**DETAILED ACTION**

**Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 15,22-34 are drawn to a sport shaft, classified in class 473, subclass 513.
- II Claims 16-21 are drawn to a method of making a sport shaft, classified in class 473, subclass 505.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the apparatus could be made without having the step of wrapping a synthetic material as claimed.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney B. Kinnear on July 6, 2005 to request an election to the above restriction requirement. Applicant's representative has chosen not to elect at this time which resulted in the mailing of this Office action.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant's petition to make special notes that applicant believes infringing of the application is occurring. It is requested that any additional information available be provided for further review by the examiner.
